Profile

I am a game programmer with 3 years of experience in AA/AAA on C++ engines. I also developed many small games with Unity, Godot and Renpy during game jams and solo. I strive to keep code documented and consistent, and to maintain good UX / quality of life in every aspect of my games.

Tech

- Unity (C#), Godot (GDScript), Renpy (Python), Unreal Engine (C++), PICO-8 (Lua)
- Python & Bash scripts, GitHub Actions / Travis CI

Professional experience

Evil Genius 2

2020.10 – 2022.03 @ Rebellion Warwick, UK (remote work from France), team of ~60

Construction and management simulation for Windows, PS4, PS5, Xbox One, Xbox Series S/X

In-house engine (C++) - Gameplay & UI programming

- Temperature system (how furniture affects lair temperature and how it affects units)
- Trap combo tracking system
- New events & objectives
- Misc fixes & improvements

Hotshot Racing

2018.11 – 2019.11 @ Sumo Digital, UK, team of ~15

Racing game for Windows, Switch, PS4, Xbox One

In-house engine (C++/C#) - Gameplay, UI & Tool programming

- Money reward & car part unlock/purchase system
- Improve track surface effects on gameplay (change speed) and aesthetics (PFX, skid marks)
- Improve boost system (charge gauge, PFX and screen FX, HUD animations)
- Improve debug tool (C#)

Ghost Recon: Breakpoint

2017.08 – 2018.08 @ Ubisoft Paris, France, 3C team of ~15, full team of ~200

Open-world military shooter for Windows, PS4, Xbox One

In-house engine (C++) - Gameplay programming (main character)

I worked with the rest of the 3C team (game designer, animators), the UI team and a sound designer to implement the following features:

- Injury system (gameplay, camera FX, animation, voices, network replication)
- Suppressive fire (camera FX, animation, voices, network replication)
- Sync shot drone (gameplay, animation, network replication)
- Help integrate the first unit tests in character gameplay code

Guns, Gore & Cannoli 2

2016.08 – 2016.12 @ Crazy Monkey Studios, Belgium (internship), team of 5

Indie run 'n' gun for Windows, Switch, PS4, Xbox One

Unity (C#) - Gameplay & Tool programming, Level design

- Level design: prototype area with houses (whiteboxing, enemy spawns, switches and events)
- Gameplay programming: bomber enemy (movement and attack behavior)
- Tool programming: improve AI navmesh generation and custom editor tools

Game jam projects

Daughter of Pearl

2026.02 - 2026.04 @ Metroidvania Month 31 x Magical Girl Game Jam 13

A prototype of water magical girl metroidvania for Windows, macOS, Linux

Godot (GDScript) - Programming, Management

- Manage team & project from concept to release
- Implement overall metroidvania system (character moves, exploration with mini-map, skill unlock, save system) following Metroidvania Forge Tutorial Series
- Improve and tune enemy AI implemented by another programmer
- Implement intro cinematic system
- Misc integrations

Starship Breakers: Alpha

2024.09 - 2025.10 @ Solo, Josei Jam 2025, Sunofes 2025

A sci-fi – climbing escape game visual novel for Windows, macOS, Linux

Unity + Naninovel (C#) - Writing, Programming, Management

- Communicate world vision and manage team & project from concept to release
- Write full script with branches (13k words)
- Integrate assets and animate the scenes
- Design and implement puzzles

Era's Time Delivery Service

2022.08 – 2023.08 (573h) @ Magical Girl Game Jam 6 online, team of 7

Prototype of turn-based battle RPG

Unity (C#) - Programming, Game design

- Develop RPG framework (started before jam) for turn-based battle system
- Game-specific features: time control skills
- Collaborate with game designer to define and balance skills
- Manage team & project, build & release on itch.io

Eminent Domain

2022.07 – 2023.04 (245h) @ MechJam III online, team of 6

2D scrolling shoot 'em up for Windows, macOS, Linux

Unity (C#) - Programming, Game design

- Develop Shoot 'em Up framework for Unity (started before jam)
- Game-specific features: weapon power-up, enemy shield, enemy grenade
- UI: implement main menu settings, integrate character health gauge
- Design 1 level with enemy waves, enemy behavior and bullet patterns
- Manage team & project, build & release on itch.io

Education

Postgraduate degree in Interactive Digital Experiences

2015.10 – 2017.02 @ Gobelins (Paris, France) - Enjmin (Angoulême, France)

Double degree of Master of Science in Engineering

2011.09 – 2015.08 @ Supélec (France) - Keio University (Japan)

Languages

French (Native), English (Full working proficiency), Japanese (Advanced), German (Intermediate)

Korean (Pre-intermediate), Vietnamese (Beginner)
